

QUALITY POLICY

Reid Industrial Graphic Products is an Australian owned business, whose aim is to ensure customer satisfaction through the development, manufacture and sales of specialised screen printed and related products, primarily for the electronics and associated industries.

The Directors and staff of Reid Industrial Graphic Products are fully committed to comply with the requirements and continually improve the effectiveness of the Quality Management System outlined in the Quality Manual.

As quality is everyone's responsibility, all members of the business are dedicated to the task of improving the companies efficiency by preparing, implementing and following the procedures and methods defined within the Reid Industrial Graphic Products Quality System.

It is the policy of the Directors to establish and maintain an effective and efficient quality system, planned and developed in conjunction with all key personnel. This system will be based on the requirements of AS/NZS ISO 9001:2015 Quality Management System - Requirements.

The Quality Manual outlines the system, which ensures that the quality requirements of both the business and its customers are identified, and that uniform control of these requirements is consistently and adequately maintained. It defines how effective control is established through the use of written procedures, and includes provision for the prompt detection and disposition of product and system defects.
