

Leaders in Printed Interface Products

Reid Industrial Graphic Products is an established manufacturer of interface products located in Redcliffe, Queensland. Established in 1990, our team of skilled professionals are supported by an advanced manufacturing structure accredited to AS/NZ ISO 9001:2015.

By utilising the latest manufacturing technologies, we have the engineering and production capabilities required to design, manufacture, assemble and supply Membrane Switches, Overlay Panels, Touchscreen Protectors, Capacitive Switches, Labels, and various Electronic and Back-lit Instrumentation Panels including NVIS capability.

Reid Industrial has designed and manufactured products for a diverse range of markets and industries locally, nationally and internationally including: Defence, Aerospace, Medical Equipment, Mining, Power Equipment, Agriculture, Air Conditioning, Gaming, Meat Processing, Water Treatment.

We also specialise in the reverse engineering of replacement control panels for all devices, and procurement of high specification label materials for the defence industry.

Technology Leading Capability

We have a well-equipped pre-press and production facility, including a large format industrial flatbed digital printer, 6 x Automatic screenprinting machines with inline curing capabilities up to 130°C. Our printing equipment is substantially supported by Laser cutting, Forme Cutting, Projecon Thermal Embossing, CNC Router and testing equipment. All housed in a modern, purpose-built 1500 square metre building.

Our continually improving management system enables tracking of all projects as they pass through the design and manufacturing phases in real time. Being unique to Reid, our enterprise resource software allows 100% traceability of Production Build materials, inspections, documentation and testing.

Key Projects

- * Lockheed Martin – Overlay Panels for Tactical Air Defence Radar System (TADRS)
- * SAAB – Fire Retardant Labels for Collins Class Submarines
- * Total Aerospace – Membrane Switches with NVIS & Backlighting Capabilities for Westpac Rescue Helicopter Project
- * Eniquest – HMI Panels for Military In-Service Generator Repairs
- * Topcon – HMI Interface with Electroluminescent Backlighting for the Agriculture Industry
- * Schneider Electric – Overlay Panels and Labels for ADV2 HMI Controller
- * Tritium – Complete HMI Assembly for Veefil Fast Charger
- * Actron Controls – Overlay Panels for BM2 Air Conditioner Controller
- * GE Energy (NZ) – Membrane Switches for Vibration Analyser Unit
- * Cook Medical – Overlay Panels for MINC Desktop Incubator

Certifications and Achievements

- * Certified by Sci Qual International to ISO 9001:2015 Quality Management System
- * Sci Qual International - Quality Management System 20 Year Gold Award
- * SGIAA Screen & Digital Print Awards Gold Medal recipients for the past 10 years in the categories of: Printed Electronics and Touch Pads.
- * Our commitment to a sustainable environment has been significant, with our facility 50% powered by solar energy and recycled eco-friendly chemicals and water being used in our Automatic in-line screen washing machine.
